## Experiment 1:

Implement three nodes point – to – point network with duplex links between them. Set the queue size, vary the bandwidth and find the number of packets dropped.

**Step1:** Open text editor, type the below program and save with extention .tcl (**prog1.tcl** )

```
set ns [new Simulator]
set nf [open prog1.nam w]
$ns namtrace-all $nf
set nd [open prog1.tr w]
$ns trace-all $nd

proc finish {} {
global ns nf nd
$ns flush-trace
close $nf
close $nd
exec nam prog1.nam &
exit 0
}

set n0 [$ns node]
set n1 [$ns node]
set n2 [$ns node]

$ns duplex-link $n0 $n1 1Mb 10ms DropTail
$ns duplex-link $n1 $n2 512kb 10ms DropTail
$ns queue-limit $n1 $n2 10

set udp0 [new Agent/UDP]
$ns attach-agent $n0 $udp0
set cbr0 [new Application/Traffic/CBR]
$cbr0 set packetSize_ 500
$cbr0 set interval_ 0.005
$cbr0 attach-agent $udp0
set sink [new Agent/Null]
$ns attach-agent $n2 $sink
$ns connect $udp0 $sink
```

# Computer Network Laboratory (BCS502)

---

```
$ns at 0.2 "$cbr0 start"  
$ns at 4.5 "$cbr0 stop"  
$ns at 5.0 "finish"  
$ns run
```

**Step2:** Open text editor, type the below program and save with extention .awk (**prog1.awk** )

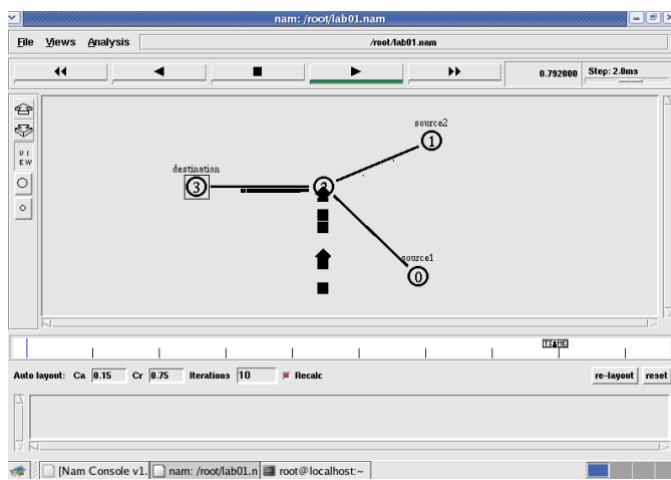

```
BEGIN {  
    dcount = 0;  
    rcount = 0;  
}  
{  
event = $1;  
if(event == "d")  
{  
    dcount++;  
}  
if(event == "r")  
{  
    rcount++;  
}  
}  
END {  
printf("The no.of packets dropped : %d\n ",dcount);  
printf("The no.of packets received : %d\n ",rcount);  
}
```

**Step3:** Run the simulation program

[root@localhost~]# ns prog1.tcl

(Here “ns” indicates network simulator. We get the topology shown in the snapshot.)

# Computer Network Laboratory (BCS502)

**Step 4:** Now press the play button in the simulation window and the simulation will begins.

**Step 5:** After simulation is completed run **awk** file to see the output ,

```
[root@localhost~]# awk -f prog1.awk prog1.tr
```

Number of packets droped = 16

**Step 6:** To see the trace file contents open the file as ,

```
[root@localhost~]# vi prog1.tr
```

```

The window shows the command "[root@localhost ~]# awk -f la4.awk la4.tr" followed by the output "Number of ping packets dropped due to congestion are 20". The terminal is part of a desktop environment with a blue header bar and a taskbar at the bottom.

```
